TECHNICAL HIGHLIGHTS

FEATURES

ICC's termination aid is designed to fit comfortably in the palm of your hand.

ICC's punch down tool can be used to punch down IC110 connecting blocks.

The termination aid is designed to absorb and distribute the force of an impact tool during termination.

The cushioned rubber top can be adjusted for high or low impact termination.

HAND-HELD TERMINATION AID AND THE IC110 PUNCH DOWN TOOL

ICC's punch down tool has been designed with an anti-slip rubber grip and an ergonomic body, making it a safe and effective termination tool for all IC107 modular connectors and IC110-type patch plugs. The punch down tool also includes a 110 and a 66 blade conveniently stored in the handle. ICC's termination aid makes hand-held termination of connectors safe and easy by eliminating slippage, and by providing a firm base.

- A** Blade release
- B** Grid ridge stop
- C** Impact setting
- D** Blade storage
- E** Fits all IC107 modules and IC110-type patch plugs
- F** Molded of strong ABS material
- G** Ergonomic lightweight design
- H** Optional mounting holes
