Scaleable IP Video Enterprise Solutions

VideoProtein™ Management Systems - Customizing IP Technology Solutions for Enterprise, Central Monitoring Station, and Government

VideoProtein's Web-Based IP Video Camera and Content Management Platform Leverages Existing IP Network Infrastructure

ANYWHERE...ANYTIME...REMOTE VIDEO MONITORING & SURVEILLANCE FROM ANY BROWSER-BASED DEVICE

Smart Surveillance

View, record and manage cameras and video content from multiple locations from a single logon on and single screen. Nothing could be easier. Video Protein's "Intelligent Recording" saves bandwidth and storage costs by recording when an event is triggered, which is often less than 10% of time.

Cost Efficient and Scalable

VideoProtein is a standards-based software only solution that easily installs on any Window or Linux network. No proprietary hardware or client software is required. Cameras are added like other IP devices in increments from 1 to 1000. There are no limits other then available network bandwidth.

Simple Third Party Integration

VideoProtein facilitates simplified integration with Access Control, POS, CRM, Biometrics, RFID by taking advantage VideoProtein's XML interfaces

Business Development/Partner Opportunities

Reseller Programs, Private Branding & Bundling Opportunities.

Applications

- Remote Surveillance, Mobile Monitoring, Alarm Verification and Usage Management
- Centralized Viewing with Assorted Cameras and DVR Brands onto One Screen
- Retail Sales & Support Centers
- Video Event Validation
- Compliance Merchandising
- IP Video Teleconferencing
