Introduction

The EDS-308/305 series includes 8- and 5-port Ethernet switches that provide an economical solution for your industrial Ethernet connection, and the built-in relay warning function alerts maintainers when power failures or port breaks occur.

These switches have been designed for harsh industrial environments, such as in hazardous locations (Class 1 Div. 2 /Zone 2) that comply with FCC, TÜV, UL, and CE standards.

EDS-308/305 Series includes 2 models: one with an operating temperature range of 0 to 60°C, and the other one with extended operating temperature range of -40 to 75°C. These 2 models are designed for standard and extended operating temperatures respectively, and go through a 100% burn-in test to ensure that they fulfill the special needs of industrial automation control.

Redundant Power Inputs

EDS-308/305 provides two power inputs that can be connected simultaneously to live DC power sources. If one of the power inputs fails, the other live source acts as a backup to provide the EDS-308/305's power needs automatically.

Relay Output Alarm for Port Breaks, Power Failure

EDS-308/305 provides relay contact outputs to warn technicians on the shop floor when the power fails or a port link breaks, so that they can respond quickly with appropriate emergency operation procedures.

Broadcast Storm Protection

EDS-308/305 protects itself from receiving too many broadcast packets. During normal use, broadcast packets will be forwarded to all ports except the source port. However, EDS-308/305 will discard broadcast or multicast packets if the number of those packets exceeds a threshold in a preset period of time. When the preset period expires, it will then resume receiving broadcast or multicast packets until the threshold is reached again.

Transmits VLAN Tag Packets Transparently

The IEEE802.1 standard defines the VLAN tag, including TPID Control (Information) with an additional 4 bytes inserted into an untagged Ethernet frame. EDS-308/305 can transmit and receive these data packet without any change.
