Overview

CP-104UL V2 is a Smart Universal PCI Multiport Serial Board designed for POS and ATM applications, and for use by industrial automation system manufacturers and system integrators. CP-104UL V2 is compatible with all popular operating systems, and each of its 4 RS-232 serial ports

supports data rates of up to 921.6 Kbps, and provides full modem control signals, ensuring compatibility with a wide range of serial peripherals. In addition, CP-104UL V2 works with both 3.3V and 5V PCI buses, allowing the board to be installed in virtually any available PC server.

Designed for Standard and Compact-sized Computers

CP-104UL V2 is an MD1 low profile board, compatible with 3.3V and 5V PCI bus, that only requires a 5 VDC power supply.

This means that CP-104UL V2 fits any sized host computer, ranging from shoebox to standard industrial sized PCs.

Top Performance with 128-byte FIFO and on-chip H/W, S/W Flow Control

Our 17 plus years of experience in serial board design is now concentrated in Moxa's new top performance serial data transmission chip, called Turbo Serial Engine™, which equips the CP-104UL V2 series board with a 128-byte FIFO, on-chip

hardware and software flow control, and burst data mode. This makes CP-104UL V2 the top performing smart multiport serial board in the world.

Support for Major Windows and Linux/Unix OS drivers

Moxa continues to add support for today's mainstream operating systems, and CP-104UL V2, which supports reliable Windows COM and Linux/UNIX TTY drivers, is no exception. In addition,

other operating systems, such as embedded Windows XP and QNX, are supported for embedded integration applications.

PComm Lite Utility for Easy Management and Software Development

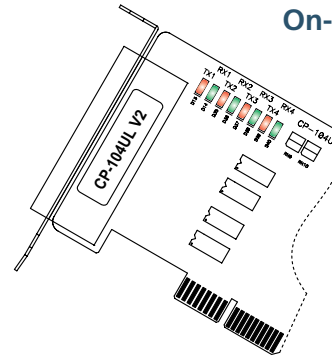

CP-104UL's software package includes Moxa's PComm Lite utility, which can be used to diagnose and monitor the status of installed Moxa serial boards. In addition, PComm Library, which includes libraries of basic serial I/O and file transfer functions, is included free of charge, giving users a complete and easy to use software development tool for Windows applications.
