- Special shielding ensures signal integrity and error-free transmission
- All-in-One bonded Dongle design eases connections, setups and cable management
- Thin and flexible cable structure saves space and lowers carrying and storage cost
- Exclusive Dongle design for MagicTwin functions embedded motherboards

What is MagicTwin®?

With integrated connectivity hardware and the innovative MagicTwin® software the multiplexing technology turns a single PC into a cost-effective 2-PC multi-user system. Two users can virtually have their own PC and run independently any two windows sessions concurrently. We turn one single PC into two.

What do you need for your Jetway motherboards to update as the 2-User System?

The Magic Dongle and.....

Dual Head AGP Graphic Card (Optional Purchased Part)

A separately purchased dual head AGP graphic card is needed for the building of MagicTwin 2-user system. It is used to connect two monitors of both stations.

USB Audio Dongle (Optional Cabling System for Speaker of Station#2)

To equip the station #2 with optional speaker you can purchase separately from your dealer the USB-to-Audio dongle. You can extend the length by adding extra USB hub available off-shelf.

KVM Audio 5M Extension Cable (Optional Cabling System)

As extensions and signal transmitters so that you can use stations that are even further away in 5 meters, KVM Audio 5M Extension Cable is embedded with the connectors of PS/2 keyboard and mouse, D-Sub 15-pin compatible VGA input and output, and the audio signals input and output for building up you virtual host in a certain distance.
