

## PCI Express to Four Slot PCI Expansion Bay

StarTech ID: PEX2PCI4

Running out of available PCI slots? Now, using a single PCI Express slot, you can add four external PCI slots - making system testing and card swapping convenient and less time consuming. Featuring a rugged steel housing to protect installed PCI cards, PEX2PCI4 supports both 3.3V and 5V cards, and includes the necessary PCI Express controller card to provide a connection between the host computer and the expansion unit that is as seamless as though the additional cards were installed directly on the motherboard.

### Applications and Solutions

- > Specially designed to convert a single PCI Express slot to four additional PCI slots
- > Ideal for system testers, and engineers who may need to swap out PCI cards
- > Newer PCI Express systems (low profile and standard profile) are limited with the number of PCI slots available. With PEX2P

### Features

- > Add an additional 4 PCI ports (32-bit/33 MHz) to your PC, using PCI Express
- > Rugged steel construction satisfies demands of industrial and server environments
- > Self-powered Expansion box with an on/off button
- > Simplifies swapping PCI cards in and out of computer systems, without ever having to take apart your computer
